

Terrada Music Score Co., Ltd. Develops World's First "Dual-screen E-paper Music Score Device" Bringing a Revolution to Music Scene

Terrada Music Score Co., Ltd. (Shinagawa-ku, Tokyo; Representative Director: Fujio Noguchi) has developed the world's first "dual-screen E-paper music score device (brand name: GVIDO (hereinafter referred to as the "Digital Music Score Device")) for the purpose of providing new value to people involved in music, bringing a revolution to music scene through digitizing music scores.

<What is GVIDO?>

The name "GVIDO" was given as a mark of respect to Guido d'Arezzo, who devised the foundations of staff notation in the early 11th century.

<Digital music score device>

By utilizing a 13.3-inch "Mobius" flexible electronic paper display produced by E Ink Corporation, the Digital Music Score Device developed here has achieved thinness, light weight and almost the same size as a paper music score (the prototype's size: 480mm wide, 310mm long and 5.9mm thick when opened and weighing approx. 650g) despite using large dual displays. It supports a long-period of use, benefitting from the effect of the low power consumption of electronic paper. Furthermore, both displays come with Wacom's digital pen solution embedded and users can directly annotate on music scores as if they do it on paper.

The PDF file format is supported and can be saved along with both handwriting and bookmarks. With Wi-Fi and Bluetooth functions embedded, it will enable music scores to be purchased from digital music score services in the future, and a variety of accessories can also be connected. Additionally, it is equipped with a microSD card slot along with the internal memory, a large quantity of music scores can be carried.

<A Variety of Usages Considered with the Aim of Realizing an Digital Music Score Device>

Looking forward, through practical experiments of the Digital Music Score Device, we will verify that it will be a user-friendly product, and consider a variety of uses by collaborating with individuals and companies involved in music as well as music universities and orchestras.

<Exhibit at midem>

From June 3 to 6, 2016, the Company will participate in the midem (Marche International du Disque, de l' Edition Musicale et de la Video Musique), which is one of the world's largest international music industry conventions, held in Cannes, France. Through the event, we will exchange opinions with attendees on the uses of the Digital Music Score Devices in pursuit of a speedy launch of the product. Please see <http://www.midem.com/> for further details on the midem.

<About Terrada Music Score>

The company was jointly established by Warehouse TERRADA and F55 Creative Design Studio to develop Digital Music Score Devices. In the future, we will aim to work together in various ways to bring the Digital Music Score business into full operation.

Company name: Terrada Music Score Co., Ltd.

Businesses: General business related to digital music scores

Representative: Fujio Noguchi, Representative Director

Address: 2-6-10 Higashi-Shinagawa, Shinagawa-ku, Tokyo 140-0002

Established: July 2015
